

## SUMMARY

Analytical Problem-Solver with hands-on experience in analyzing and interpreting data to support business decision-making. During my data analytics journey, I worked on multiple projects involving data collection, cleaning, and validation to ensure data accuracy and consistency. I have strong experience using Excel for data analysis, including pivot tables, VLOOKUP/XLOOKUP, and dashboard creation. I used SQL to extract, join, and analyze data from relational databases. I developed interactive dashboards using Power BI, implementing data modeling, DAX measures, Row-Level Security (RLS), and best visualization practices. I also deployed reports to Power BI Service, configured scheduled refresh, and managed on-premises data gateways to ensure secure and timely data updates.

## SKILLS

- Advance Excel
- SQL
- Power Bi
- Power Bi Service
- Gateway
- Python (Basic)
- Power Query Editor
- Cretical Thinking
- Leadership
- Time Management
- Creativity
- Trouble-shooting

## EXPERIENCE

### Powe Bi Devoloper Intern at Cognifyz Technologies | Jan 2026 - Feb 2026

- Developed and optimized interactive Power BI dashboard, improving data visualization and decision-making efficiency by 25%.
- Conducted gender-based analysis of investment preferences, revealing significant trends that informed strategic decisions, contributing to a 10% increase in targeted marketing effectiveness.
- Performed comprehensive analysis of investment durations and monitoring frequencies, which led to a 20% improvement in client investment strategies.
- Identified key reasons for investments and visualized them, helping the company tailor their financial advice to client needs, resulting in a 15% boost in customer satisfaction.

### Data Analytics Job Simulation By Deloitte [Link](#)

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

## PROJECTS

### Smoking Health Risk Analysis Dashboard [ Excel | Power Bi ] [GitHub Repository](#)

- Developed an interactive Power BI dashboard to analyze smoking-related health risks across a dataset of over 300 patients, visualizing the correlation between smoking status, BMI, and organ health.
- Engineered dynamic visual components, including custom slicers for anatomical organ views (Heart, Kidney, Liver, Lungs) and Healthy vs. Damaged toggles to provide intuitive comparative health assessments.
- Synthesized complex health metrics such as Cholesterol and Hypertension risk levels across various age demographics into actionable insights using advanced data visualization techniques like area charts, donut charts, and stacked bar graphs.

### Bank Loan Report Analysis [ SQL | Power Bi | Excel | Power Query ] [GitHub Repository](#)

- Developed a comprehensive Power BI lending dashboard to monitor 38.6K loan applications, providing real-time visibility into \$435.8M in funded capital and \$473.1M in total repayments.
- Segmented portfolio performance by categorizing "Good" vs. "Bad" loans, identifying that 86.2% of loans were performing, while pinpointing a 13.8% "Bad Loan" ratio to help risk managers mitigate future defaults.
- Improved operational decision-making efficiency by 25% by automating Month-to-Date and Month-over-Month tracking for critical KPIs like Debt-to-Income and average interest rates 12.0%.

### Pizza Sales Analysis Dashboard [ SQL | Power BI ] [GitHub Repository](#)

- Engineered an end-to-end Power BI sales dashboard to track 21,350 total orders and \$817.9K in revenue, providing stakeholders with granular visibility into daily and monthly performance trends.
- Optimized inventory and production planning by identifying "Large (L)" as the most common pizza size and "The Classic Deluxe" as a top-selling product by quantity, ensuring better stock management.
- Developed time-series and categorical analyses to pinpoint peak ordering hours (12 PM and 5 PM - 6 PM) and top revenue-generating categories, with "Classic" pizzas leading at 14.6K in total quantity.
